Extension activity report

2023-2024

The extension activity was carried out at Sardar Dadasaheb Mane Mahavidyalya Rahimatpur. Dr. Viridhaval Nalavade (Assistant Professor, Department of Biotechnology) was invited as a Guest Lecturer for Agriculture Supplemental Business Workshop. Two M.Sc Students (Mr. Shashank Shinde and Mr. Prathmesh Pawar) and three B.Sc students (Mr. Viraj Kadam and Mr. Shantanu Ingale) were also participated in this activity. Farmers and agriculture students are the target audience for the workshop. Participants in this program included instructors and other college students. This session aims to give farmers some fresh ideas and technologies for their enterprises in agriculture. Professor Krushi Vidnan Kendra Koregaon leads the first session, which covers housing and feeding of the animals. Dr. Viridhaval M. Nalavade, our department assistant professor, then provided a tutorial on several biofertilizers and their advantages during the second session. AI in agriculture is the subject of the third session. Following the completion of each session, a certification and vote of gratitude takes place. The benefits of microbial cultures, azolla and duckweed cultures, and biofertilizers are demonstrated by our department students after this session, and other college students are interested in attending their sessions.

About 100 parents and 135 students were benefited from the activity.
