Department of Nanoscience and technology
Webinar Report**

Department of Nanoscience and Technology organized Webinar on “**Role of Nanotechnology in Immunity Enhancement**” on Thursday **10th December 2020**; sponsored by **RUSA**.

For this webinar, **Dr. S.H. Mujawar**, Co-ordinator, Department of Nanoscience and technology gave an introductory and welcome speech. In that he explained about Nanomedicine and current situation of Covid-19. Also he briefly introduced chief guest and speakers of the event

After that honorable Chief guest **Dr. Sathe Sanjay** from Pratibha hospital, Satara. He gave information about **Immunity Boosting measures using Nano medicine for self-care during COVID 19 crisis**. He provided information about preventive methods for Novel corona virus diseases .He also provided lot of information about recognizing early symptoms, testing methods for COVID-19 and medication which are currently used for treatment. Also he guided with the diet to enhance immunity.

For next session **Dr.Kamble S.B.** Department of Chemistry Yashwantrao Chavan Institute of science (Autonomous), Satara guide on the topic **Novel Discoveries in Nano-Medicine for Covid - 19**.He showed detailed history and development of nanomedicine and its worldwide current status. He also guided novel discoveries in area of nanotechnology for the treatment of SARS and MARS virus family.

. At last Miss. Pawar P. M. proposed vote of thanks. The whole event was anchored by Miss Shinde S. S.

120 participants were participated in this activity. All the participants were very curious about the subjects. It inspired students for make career in the field of Nanoscience, Role of Nanotechnology in Immunity Enhancement.
